Cost composition (share of the fully-loaded cost)

What this means: A largely automated batch rail. At **\$1.34** it is far cheaper than checks or wires, so migration value is **moderate** — worth moving time-sensitive items, but not the main savings driver.

Sources: Network fees — Fed / Nacha / The Clearing House pricing. Failure rates — Nacha return thresholds (~1.5% typical); failed-payment cost ~\$12.10 (LexisNexis). Fraud — AFP Payments Fraud Survey; 2024 losses check ~\$24B, ACH ~\$11B, APP ~\$12.5B. Compliance — FFIEC / BSA-AML. Liquidity — RTP prefunded joint account (frbsservices.org). All figures are conservative public-benchmark midpoints, to be calibrated with Payfinia production data. See Deliverable 1.
